**Biography:**

Christopher Campbell has been in radio professionally for over 20 years and has been a local morning radio host in Western Colorado for over a decade. He currently manages a locally owned and operated rock radio station out of Fruita, CO. He has been in various sales and technical design positions for a variety of industries for over a decade.

Christopher began his career in solar electric with Atlasta Solar Center in 2018 and is extremely passionate about renewable energy growth and is involved in efforts at the local and state level to advocate for renewable energy solutions to meet local and state goals; including solar electric and electric vehicle infrastructure expansion. He was involved in efforts to bring C-PACE to Mesa County. Christopher has shown impressive growth within the organization over the last five years managing an array of projects including off-grid, residential, small-to-medium commercial, utility scale and government projects. Christopher also excels at assisting both new and existing customers with their storage needs.

Christopher is an advocate for and engaged with various groups with a focus on renewable energy, sustainability and other environmental issues in the region, state and national level. He also has a passion for his family, six-year old daughter Lila, gardening, woodworking and keeps a handful of beehives.

Solar or Storage Experience:

Christopher manages and designs a wide variety and portfolio of projects from off-grid, grid-tie (both with and without storage) of all sizes and project types. He excels at customer satisfaction and managing projects from beginning to end working with personal and professional integrity.

In his five years with Atlasta Solar Center he has developed a key relationship with Panasonic and elevated Atlasta Solar Center to an “Elite Installer Status” held by only 22 installers nationwide. Atlasta Solar Center is currently the only installer in Colorado with this recognition.

Most recently Christopher has worked on a variety of solar projects for local non-profits in Grand Junction for both solar and electric vehicle chargers including Food Bank of the Rockies and Community Food Bank.

My Priorities:

With a passion for the industry today and in the future I desire to do all I can to develop relationships to further industry innovation, opportunities and legislative opportunities both with solar and electric vehicles. I am engaged legislatively and regularly appear in front of the state legislature and other organizations such as the AQCC and PUC to testify on behalf of myself, Atlasta Solar Center/Sunrabbitt Clean Transport, customers, interested parties and the industry as a whole.

My Strengths:

I am committed to leadership skills, time management, persistence, patience and problem solving personally and professionally. I am dedicated and enthusiastic about my daily contribution to customers, Atlasta Solar Center, the future of solar, storage and electric vehicles in Colorado.

“Always looking for a new opportunity and challenge, Christopher Campbell would be a great representative and advocate on the COSSA board, as well as also a unique representative for COSSA from Western Colorado.”

- Louis A. Villaire
